1.   1 / 1 point

Which of the following named ranges is valid?

○ Qtr1

○ Quarter-1

○ Sales 2016

◉ _Sales2016

> ⊘ **Correct**
>
> Yes, this is correct. A named range can begin with an underscore symbol and contain the text string Sales2016.

2.   1 / 1 point

Named ranges behave like absolute cell references

◉ True

○ False

> ⊘ **Correct**
> Indeed. They remain fixed when auto-filling formulas across your spreadsheet.

3.   1 / 1 point

Named ranges always contain a single cell.

○ True

◉ False

> ⊘ **Correct**
> Yes, that's right. A named range can refer to a single cell or a range of cells.

4.   1 / 1 point

Which of the following are valid characteristics of names for named ranges?

(Multiple answers possible. Partial credit awarded)

☑ Underscores

> ⊘ **Correct**
> Yes! You can use underscores in a name for a named range.

☑ Restricted length (no more than 255 characters)

☐ Hyphens

☐ Labels used in cell references

☑ Letters

5.   1 / 1 point

Uma wants to create a name for the range showing the Expenses for 2017. She types in Exp2017 but Excel rejects the name. What is the problem?

○ Exp2017 is a mix of letters and numbers which is not permissible for names

◉ Exp2017 is a cell reference

○ Exp2017 is a heading in the document so it cannot be used as a name

6.   1 / 1 point

We can use the name box to:

(Multiple options possible. Partial credit awarded)

☑ Name a new named range.

☑ Navigate to the range of an existing named range.

☐ Change the name of an existing named range.
